
Follow-Up Sequence Product Conv Report Broken

Posted by jesse.mecham - 2009/04/16 07:09

I rely heavily on the follow-up sequence product conversion report and for the past several days I've noticed that it's not updating.

I'll choose one of my FUS, choose the product, and when I run the report it shows a conversion rate of 37%.

If I choose a different FUS and a different product (or the same product) it shows the same numbers with a conversion rate of 37%.

I submitted a ticket via the fusebox but am only hearing crickets.
