## file upload via API

Posted by jvantslot - 2008/10/14 14:51

---

Hi All,

I need to upload a file via the API to link with a contact. I don't see in the API docs or the xml field reference any indication of where the "File Box" records reside.

Anybody have any ideas for me about how to handle a file upload through the API?

Thanks for any help!

james

There's not a way to upload files to a contact's FileBox through the API.

Sorry...

Can you upload a file via a webform ?

or is there a URL to can post to to upload a file.?

What is the method to do this.

Again...

How would you integrate uploading documents automatically.

The only way to upload files is through being logged into the app.
