
Print Calendar

Posted by JoshuaK - 2008/09/29 05:23

it would be great to be able to have a PRINT function for the Calendar. Though I'm primarily talking about the "Day" view...it would also be helpful to print the "week" and "month" views as well.

This is helpful for outside sales people who have to leave the office to attend appts as we cannot (yet) access infusion remotely on phones, etc.

This is a great idea. I believe I had heard it a couple of times before as well.

We probably won't be able to do any work on this particular suggestion for the next 6 weeks or so as we already have the pipeline full of stuff we'll be working but I'll bring it up as something to potentially attack after that.

As a potential solution in the meantime, Infusionsoft can be accessed via any WAP enabled phone by going to <https://yourappname.infusionsoft.com/micro>.

While there is limited functionality available, users can view tasks and appts, search for people, and send emails.

In addition, we have contracted a resource to build us an iPhone integration so remote users that have iPhones will be able to access that. We are targeting an end of the year/beginning of next year release for that application.

Brad

Awesome. I was unaware of the "micro" app. That's very helpful. And I'm super excited about the Iphone app.

For those who want to check out the current state of the iPhone app, you can check out a preliminary demo here:

http://dl.getdropbox.com/u/10942/Infusionsoft/2008-08-21_1521.swf

We still have some work to do and there is a really good chance it will change from what you see in this demo, but feel free to take a look and throw us some suggestions.

We just received a beta version of the iPhone app and we are testing it out. Not sure on a release date but we are still working on it.

Great News....

Who do I need to sleep with to be a beta tester?

Um, I think its Brad ;)

I'm not sure the iPhone app is worth that.

Fair enough - although I'm sure Brad is a great guy!!!

I am so looking forward to Infusion Convention.... I am booking my flights this week.

Hopefully have most of my application set up by then :)

I'll bring my iPhone just in case :)

I'm about ready to invest the time/money in webexone.com solely for its calendar function.

The calendar works great but, importantly, you can print the thing and take it to meetings or, in my case to court.

We have just about turned over all of our law office/client management to infusion except for this darn calendar issue. .. Once we (Infusion) has a great working calendar there's another whole market for law firms who would switch from their current client management application to infusion.

I kinda hate to invest the time/effort/money (not much money but time, yes) into webexone, only to have Infusion show up with their really cool, printable calendar in a few months.

Any real estimate in when we might see one?
